EDUCATION

Georgia Gwinnett College — Lawrenceville, GA

Cybersecurity Certificate — Anticipated May 2026

GPA: 4.0

Bachelor of Arts in Psychology — December 2021

GPA: 3.5

RELEVANT COURSEWORK

Network Security

Operating Systems Security

Cyber Defense & Incident Response

Risk Management & Compliance

Cryptography Fundamentals

PROJECT EXPERIENCE

Cyber Defense Simulation Labs (TestOut Security Pro / Cyber Defense Pro)

- Conducted vulnerability scanning exercises to identify simulated enterprise system weaknesses
 - Monitored security logs to detect anomalous activity and support incident response escalation
 - Configured firewall rules, VPN connectivity, and intrusion detection system policies
 - Implemented authentication controls and system hardening techniques across Windows and Linux environments
 - Evaluated cybersecurity risks and documented mitigation recommendations in structured reports
-

WORK EXPERIENCE

Department of Veterans Affairs — Atlanta, GA

Clinical Research Coordinator (GS-0601-09) | 2015 – 2025

- Supported regulatory compliance reviews and operational risk mitigation in federally governed programs
- Maintained audit-ready documentation aligned with federal policy and quality assurance standards

- Analyzed structured datasets to identify inconsistencies and improve operational performance
- Coordinated with multidisciplinary stakeholders to ensure adherence to procedures and program requirements
- Contributed to workflow improvements that enhanced documentation accuracy and response timelines

CYBERSECURITY & INFRASTRUCTURE EXPERIENCE

- Conducted network discovery using Nmap and Angry IP Scanner
- Performed DNS diagnostics and infrastructure evaluation using MXToolbox
- Applied CVSS methodology to prioritize remediation efforts
- Reviewed simulated event logs to identify indicators of compromise
- Developed structured cybersecurity findings reports with mitigation recommendations

CAMPUS & PROFESSIONAL DEVELOPMENT

Cybersecurity Student — Georgia Gwinnett College

- Developed beginner familiarity with NIST Risk Management Framework and federal compliance concepts
- Studied security protocols including SSL/TLS, Kerberos, PKI, and IPsec
- Learned malware defense strategies and denial-of-service mitigation principles
- Explored operating system security practices for Windows and Linux systems

SKILLS & CERTIFICATIONS

Technical: Microsoft Office (Excel, Outlook, Word), Nmap, Angry IP Scanner, MXToolbox

Cybersecurity: Vulnerability assessment (Beginner), log analysis (Beginner), risk awareness (Beginner)

Certifications:

Certiport IT Specialist — Networking

Certiport IT Specialist — Cybersecurity

CompTIA Security+ (In Progress)
