PROFESSIONAL EXPERIENCE

IT Support Volunteer

Future Successors Inc. — Community-Based | Oct 2025 – Present

40 hours/week

- Install, configure, and maintain computer hardware, software, operating systems, and peripheral devices, including printers and scanners
 - Monitor and maintain computer systems, networks, and applications; diagnose recurring issues and service interruptions
 - Provide customer-focused technical support by troubleshooting hardware and software issues and resolving user concerns
 - Perform routine IT security tasks to protect systems and data from unauthorized access or modification
 - Assist in identifying system vulnerabilities and support basic risk-mitigation practices
 - Utilize AI-enabled tools to conduct research, summarize technical information, and prepare written reports and documentation
 - Support system updates and ensure optimal performance through proactive maintenance
-

AI Data Trainer – Project Ohm (Contract)

Handshake — Remote | Nov 2025 – May 2026

20 hours/week

- Evaluate AI-generated outputs to identify inaccuracies, anomalies, and potential security risks
 - Utilize AI-enabled tools to support research, analysis, and documentation activities
 - Identify patterns, vulnerabilities, and misuse scenarios, including prompt-injection risks
 - Apply structured evaluation methods to improve data quality and system performance
 - Document findings and communicate insights to support secure system development
-

Clinical Research Coordinator

Department of Veterans Affairs — Atlanta, GA | Apr 2015 – Sep 2025

40 hours/week

- Supported IT-related and compliance-driven operations in a federal environment requiring strong attention to detail
- Maintained secure systems and documentation aligned with federal policies (IRB, FDA, GCP)
- Identified data inconsistencies and system risks, contributing to mitigation strategies
- Provided internal support to users by clearly communicating technical and procedural requirements
- Conducted vendor and third-party risk reviews to identify potential system vulnerabilities
- Supported Identity & Access Management (IAM) processes, including access reviews and documentation
- Collaborated with cross-functional teams to resolve issues, improve workflows, and ensure operational efficiency
